

Cosmic Coda

Detecting ripples in spacetime from merging
black holes and neutron stars

Tuesday October 27
5 - 7 pm

Darwin 103

Featuring historical footage of 2017 Physics
Nobel prize winner MIT Prof. Rainer Weiss,
together with modern footage of LIGO (Laser
Interferometer Gravitational Wave Observatory)

Everyone welcome!

Q & A with
Filmmaker MJ Doherty
& SSU Prof. Lynn Cominsky,
LIGO Collaboration Member

For all inquiries (including parking)
email: edeon@sonoma.edu

Rai Weiss did some of the earliest work on experimental designs for LIGO.
He shared the 2017 Nobel prize for the discovery of GWs with Caltech's Kip Thorne & Barry Barish.
